SleepAngel – Where the Air is Pure

Sleep – rest and recovery – is crucial for our physical and mental performance and quality of life. At SleepAngel, we're committed to helping everyone get a comfortable and soothing sleep every night.

Our story started when our inventor David Woolfson's daughter got an infection from an unclean pillow. Seeing her suffer motivated him to research cross-infection. He realised that pillows were the most critical part because they are just little mattresses for your head where you are most vulnerable. After all, that's where you breathe, and it contacts eyes and ears, nose, and mouth—all points of infection ingress.

Dr. Duncan Bain and David Woolfson invented PneumaPure® Filter technology to stop infection transmission in healthcare setting. It is the world's first soft surface solution that combines absolute barrier protection (clinically proven to block pathogens*, allergens, microbes, and mould) with user comfort.

SleepAngel® bedding is scientifically proven, safe, sustainable, and supportive.

Product range includes pillows, mattresses, positioners, duvets, toppers, and other soft surface products. SleepAngel for improved intimate bed environment hygiene at private homes and in hospitality industry.

Patent protected technology is independently tested and proven by Airmid Healthgroup.

*Tested pathogens include MRSA, C.Difficile, E.coli, Pseudomonas aeruginosa, Candida albicans, Aspergillus niger, Norovirus, Influenza Type A, Adenovirus 5, Coronavirus 229E (HCoV 229E)

PneumaPure® Filter Technology Brief

Abstract

Design of bedding products (pillows, mattresses, positioners, duvets, top mattresses etc.) has not provided an adequate barrier to internal product contamination. Thread, needle perforations, air vents, zippers etc. allow ingress of air and liquid borne pathogens. Contaminated bedding acts both as a reservoir and potential vector for infection transmission and trigger for the sleeper.

Barrier bedding with
PneumaPure® filter technology

SleepAngel® is the world's first bedding range to combine absolute barrier protection with airflow – for user comfort.

Combination of innovations – SafeWeld seams, PureShield fabric protection, mechanical PneumaPure® filter – result in a barrier bedding product that blocks pathogens, bacteria, viruses, fungus, and ingress of liquids, while remaining comfortable and supporting.

SleepAngel

* Tested pathogens include Coronavirus 229E (HcoV 229E), MRSA, E.Coli, Adenovirus 5, Pseudomonas aeruginosa, C.Difficile, Candida albicans, Aspergillus niger, Norovirus, Influenza Type A

HOSPITALITY by SleepAngel

Safe, sustainable, and supportive

SleepAngel

Improved guest and staff safety with SleepAngel Barrier bedding – barrier for viruses, allergens, pathogens, and liquids

Did you know that the pillow (and soft surfaces overall) is an often-overlooked link in a chain of cross-infection?

Traditional bedding requires add-on protecting covers. This increases your purchase & ongoing laundry costs

SleepAngel Barrier bedding for hospitality helps to address the Covid-19 challenges

SleepAngel PneumaPure® technology, is globally patented (incl. EU, UK, North America, Japan, China, Russia, India, Middle East). Products are certified as Class I Medical Devices in the EU, registered Class I Medical Device with the FDA, and approved by the Saudi Food & Drug Authority (SFDA).

SleepAngel Hospitality Bedding range includes pillows, toppers, duvets, and mattresses. Different fillings and sizes are available

	SleepAngel bedding	Traditional bedding
Premium comfort	Yes	Yes
Protected against the Human Coronavirus	Yes	No
Suitable for people with Asthma and/or Allergies	Yes	N/A
Stays clean inside, barrier to Viruses, Allergens, Bacteria & Liquids	Yes	N/A
Easy to clean and maintain	Yes, just wipe clean	N/A
Periodic laundry requirement	Not required	Required
Warranty	2 years	N/A

SleepAngel

Alejandro Valverde, Movistar Team:

"I am very pleased that Movistar Team partnered with SleepAngel to give us the best possible kit for recovery. SleepAngel Team specified a pillow for each of us that fits our personal comfort level. A comfortable and hypoallergenic pillow is a massive improvement for our rest and recovery time."

Stuart Hogg, Scottish rugby:

"I'm thoroughly enjoying having my SleepAngel pillow. It's become part of my travel pack and I take it everywhere with me. Great consistency in sleep, no matter where I am."

Juan Pablo Molinero, Movistar Team CMO:

"Sleep environment had been an outlier for some time regarding controlling variables and protecting performance. We challenged SleepAngel to deliver on their promise of sleeping "Where the Air is Pure" and helping our athletes to recover better & reduce their risk of illness. We are delighted with the relationship and products so far and look forward to continuing our partnership. SleepAngel has become a must inside our protocols for racing."
