

NEW: SleepAngel Kids Collection

Hospital stay is hardly ever a fun matter. Even more so when you are a child. With this new collection for children, we keep the infection prevention and control part for what we are known for, and add a bit of fun with colours and patterns.

INFECTION PREVENTION

SleepAngel Medical products are a barrier to microbial contamination.

SUSTAINABILITY

Product range is created from functional fabric and filter leftovers. This means, that the product range is not fixed, can be created from blue or white fabric.

QUALITY FILLING MATERIALS

Quality filling materials as for our usual product range, including Primaloft® Bio™.

CUSTOM PATTERNS

Custom patterns created by artist Helje Vaas (Vaas&Vaas).

PRODUCT RANGE

Pillows and positioners according to the size of the small sleeper.
Production capacity according to available source.

ADDITIONAL INFORMATION

Please see to our homepage www.SleepAngel-Medical.com or contact us info@SleepAngel-Medical.com

Filling materials

Unique and innovative PneumaPure™ Filter technology is accompanied with quality filling materials to support patient's comfort and tissue viability:

1. Foam - Polyurethane foam is a resilient open-celled material, light and soft, non-abrasive. *Mattresses, positioners, wheelchair cushions*
2. Wadding – soft and thick material. *Duvets*
3. Microbeads – durable, with excellent heat and moisture transport, light, unequalled adaptability, and pressure distribution. *Positioners, nursing pillows*
4. **NEW!** Synthetic microfibre is upgraded to **PrimaLoft® Bio™**, the first-ever biodegradable*, 100% recycled synthetic staple – responsive, fluffy filling, down alternative. *Pillows, positioners*
5. Memory foam – memory foam slowly contours to body weight when pressure is applied, and then regains its shape slowly once the pressure has been removed. *Positioners, mattresses, wheelchair cushions*
6. Memory foam with holes – to improve breathability and comfort, we can also use premium memory foam with a ventilated design. *Positioners*

The PneumaPure Filter enabled SleepAngel supporting soft surface products provide pressure area care and the most effective infection prevention barrier in the medical cushioning device market.

Patterns by Helje Vaas

All patterns are printed on the functional SleepAngel Medical bedding products.

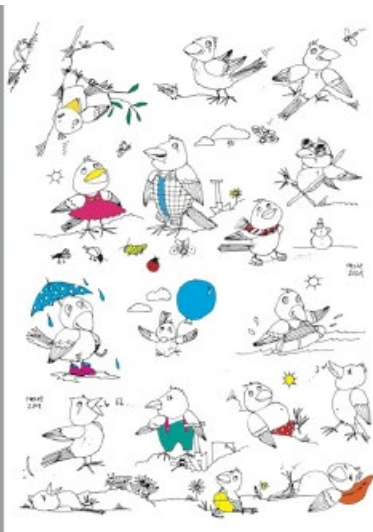

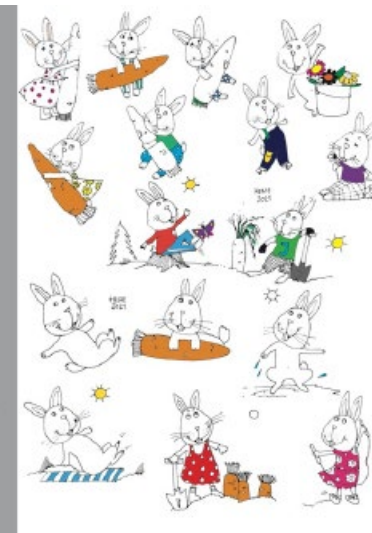

Custom patterns are created especially for SleepAngel Medical's new product collection by our R&D director Lyane Lind.

Patterns: FOX, SQUIRREL, BEAR, RABBIT, BIRD, MOOSE.

Available in colour and monochrome black and white.

If you wish to produce your own custom patterns, please contact our customer support for minimum quantities and estimates.

Haapsalu Neurological Rehabilitation Centre (HNRC) in Estonia is a hospital that focuses on providing rehabilitation services for children and adults with neurological disorders. Pictured SleepAngel Medical Kids's collection with a small patient.
